EDUCATION

Silicon Institute of Technology

Bachelor of Computer Science

Sambalpur

2024 – 2028

Tarapore School

Science – 72%

Jamshedpur

2018 – 2023

PROJECTS

Google Dork | *Python, HTML*

github.com/amad3us47/Google_Dork

- Built a Google dorking tool in Python to automate reconnaissance searches across a database of 8,000+ Google hacking dorks
- Implemented targeted domain search via CLI (`search.py -d "example.com"`) to surface exposed files, login portals, and misconfigurations
- Added a browser mode (`search.py -brows`) for interactive, in-browser dork execution

Nuclei Templates | *Python*

github.com/amad3us47/nuclei-templates

- Curated a collection of Nuclei vulnerability scanning templates and built a Python tool (`nuclei.py`) to run the full set against a target domain
- Automated bulk template execution and result triage, using ripgrep to filter scan output for confirmed findings (e.g. 200 OK responses)
- Wrote a migration script (`migrate.py`) to keep the template collection in sync with upstream updates

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, Go

Frameworks: React, Node.js, Flask, FastAPI

Databases: SQLite, PostgreSQL

Developer Tools: Git, Docker, Linux, Neovim, VS Code, Visual Studio, Jupyter Notebook

Libraries: pandas, NumPy, Matplotlib, scikit-learn

Security Skills: Web Penetration Testing, Google Dorking, Vulnerability Scanning (Nuclei), Reconnaissance, Burp Suite, Code Review

CERTIFICATIONS

Introduction to Cybersecurity Tools & Cyberattacks

IBM (Coursera)

Dec 2025

Credential ID: RAFB39YPTXY0

Cybersecurity Compliance Framework, Standards & Regulations

IBM (Coursera)
